

## Analytical labs

**NEW!**

- HPLCs (VWR) including:
  - Cooled samplers
  - Ovens
  - UV detectors
  - UV PDA detectors
  - RI detector
  - Amperometric detector
- UV Spectrophotometer (SHIMADZU)
- Coulometer "Karl Fischer" (METROHM)
- pH meter/ potentiometer (INOLAB)
- Densimeter (METTLER)
- Balances (METTLER)
- Micro-analytical balance PE26 (METTLER)
- 2 Paddle dissolution apparatus (SOTAX AT7) with smart 13 points collector
- **USP4 Flow Through Cell Dissolution CE 7smart + CP7-35 pump (SOTAX).**
- Ovens with ventilation (BINDER) and (MEMMERT®)
- Tachymeter (TESTO)
- Cooled Centrifuge (SIGMA)
- Stability chambers (VOETSCH PHARMACLIM) monitored with SYMPATI® software conform to 21 cfr part 11 :
  - 2 X 25°C / 60%RH (500 l each)
  - 1 X 30°C / 65%RH (500 l)
  - 1 X 40°C / 75%RH (500 l)
  - Stability chamber 5°C (500 l, LIEBHERR)
- Safety weighing enclosure ST1-900 to weight potent substances with micro analytical balance according to USP requirements (SAFETECH)
- Washer-disinfector for processing analytically clean laboratory glassware (MIELE)
- Water purification system Elix® 5 essential (MILLIPORE)
- Chemical Hood
- Conductivity meter Seven Compact S230 (METTLER)
- Titrator TitroLine® 7000 (SI ANALYTICS)
- Multimeter for measure of oxygen (WTW)
- TLC systems with UV lamp (254-365 nm)
